Prospect of Allied & Healthcare Professional Courses

As estimated by the World Health Organisation, by the year 2030, the global economy is projected to create around forty million new health sector jobs mostly in the middle and high income countries and despite the anticipated growth in jobs there shall be projected shortage of fifteen million health workers to achieve the sustainable development goals in low and lower middle income countries.

The rising global demand and need for health workers, over the next decade, presents significant challenges nationally as well as offers the opportunity to generate employment not only to meet the domestic demands but also to cater the global market.
